

Impact Factor Trend Graph: Ecological Informatics

Click on the "Return to Journal" button to view the full journal information.

***Impact Factor -- see below for calculations**

The journal impact factor is a measure of the frequency with which the "average article" in a journal has been cited in a particular year. The impact factor will help you evaluate a journal's relative importance, especially when you compare it to others in the same field. For more bibliometric data and information on this and other journal titles click on the "Return to Journal" button.

NOTE: Title changes and coverage changes may result in no impact factor for one or more years in the above graph.

2012 Impact Factor

Cites in 2012 to articles published in:	2011 = 75	Number of articles published in:	2011 = 46
	2010 = 125		2010 = 56
	Sum: 200		Sum: 102

Calculation: $\frac{\text{Cites to recent articles}}{\text{Number of recent articles}} = \frac{200}{102} = 1.961$

2011 Impact Factor

Cites in 2011 to articles published in:	2010 = 72	Number of articles published in:	2010 = 56
	2009 = 64		2009 = 39
	Sum: 136		Sum: 95

Calculation: $\frac{\text{Cites to recent articles}}{\text{Number of recent articles}} = \frac{136}{95} = 1.432$

2010 Impact Factor

Cites in 2010 to articles published in:	2009 = 37	Number of articles published in:	2009 = 39
	2008 = 67		2008 = 38
	Sum: 104		Sum: 77

Calculation: $\frac{\text{Cites to recent articles}}{\text{Number of recent articles}} = \frac{104}{77} = 1.351$
